

Date	15 November 2022
Team ID	PNT2022TMID23453
Project Name	Smart Fashion Recommendation Application

## Creation of Chatbot:

The screenshot shows the IBM Watson Assistant web interface. The browser address bar displays a URL from `au-syd.assistant.watson.cloud.ibm.com`. The page title is "IBM Watson Assistant | Life | Upgrade | Smart Fashion". The main content area is titled "Actions" and includes a sidebar with "Created by you", "Variables", and "Saved responses". A table lists the actions, showing one action named "Smart Fashion" with a status of "a few seconds ago" and an "Examples Count" of 12. A "New action" button is located in the top right of the table area. The bottom of the screen shows the Windows taskbar with the time 09:30 on 15-11-2022.

Name	Last edited	Examples Count	Status
Smart Fashion	a few seconds ago	12	✓

## Integration of Chatbot with HTML web page:

The screenshot displays the IBM Watson Assistant Lite interface for configuring a chatbot named 'Smart Fashion'. The interface is divided into three main sections:

- Conversation steps:** A list of steps to define the chatbot's logic. Step 1 asks for the customer's first name. Step 2 asks for the last name. Step 3 asks for a preferred email address to send a calendar invite. Each step includes a 'Continue to next step' button and a 'New step' button at the bottom.
- Customer starts with:** A section where phrases that trigger the chatbot are entered. It includes a text input field and a list of example phrases: 'I would like to discuss my situation face to face', 'I want to talk in person with someone about my case', 'Is it possible to set a date?', 'Looking for a dress', and 'Suggest me a dress'. A 'Total: 12' indicator is shown.
- Preview:** A simulated chat window showing the chatbot's responses to user inputs. The chatbot recognizes the phrase 'Suggest me a dress' and responds with 'To set up a meeting, I'll need a few details. First, what's your first name?'. It then asks for the last name and provides a 'Type something...' input field.

The interface also includes a top navigation bar with 'IBM Watson Assistant Lite', 'Upgrade', and 'Smart Fashion' options, and a 'Learning center' link. The bottom status bar shows the time as 09:35 on 15-11-2022.

The screenshot displays the IBM Watson Assistant Lite interface for previewing a chatbot integrated into a web page. The interface is divided into two main sections:

- Preview assistant:** A section where the chatbot is previewed in a simulated environment. It includes a 'Copy link to share' button, a 'Change background' button, and a 'Customize web chat' button. The background image shows a man in a denim jacket standing in a flower shop. The chatbot is shown in a white box with a 'Watson Assistant' header and a 'Built with IBM Watson' footer. The chatbot's responses are: 'To set up a meeting, I'll need a few details. First, what's your first name?', 'looking for a dress', and 'Thanks! And what's your last name?'. It also includes a 'Type something...' input field.
- Web page preview:** A section showing the chatbot integrated into a web page. The chatbot is shown in a white box with a 'Watson Assistant' header and a 'Built with IBM Watson' footer. The chatbot's responses are: 'To set up a meeting, I'll need a few details. First, what's your first name?', 'looking for a dress', and 'Thanks! And what's your last name?'. It also includes a 'Type something...' input field.

The interface also includes a top navigation bar with 'IBM Watson Assistant Lite', 'Upgrade', and 'Smart Fashion' options, and a 'Learning center' link. The bottom status bar shows the time as 09:44 on 15-11-2022.
